She **blends** fruits and vegetables for a healthy drink.

# Dinosaur - Vocabulary

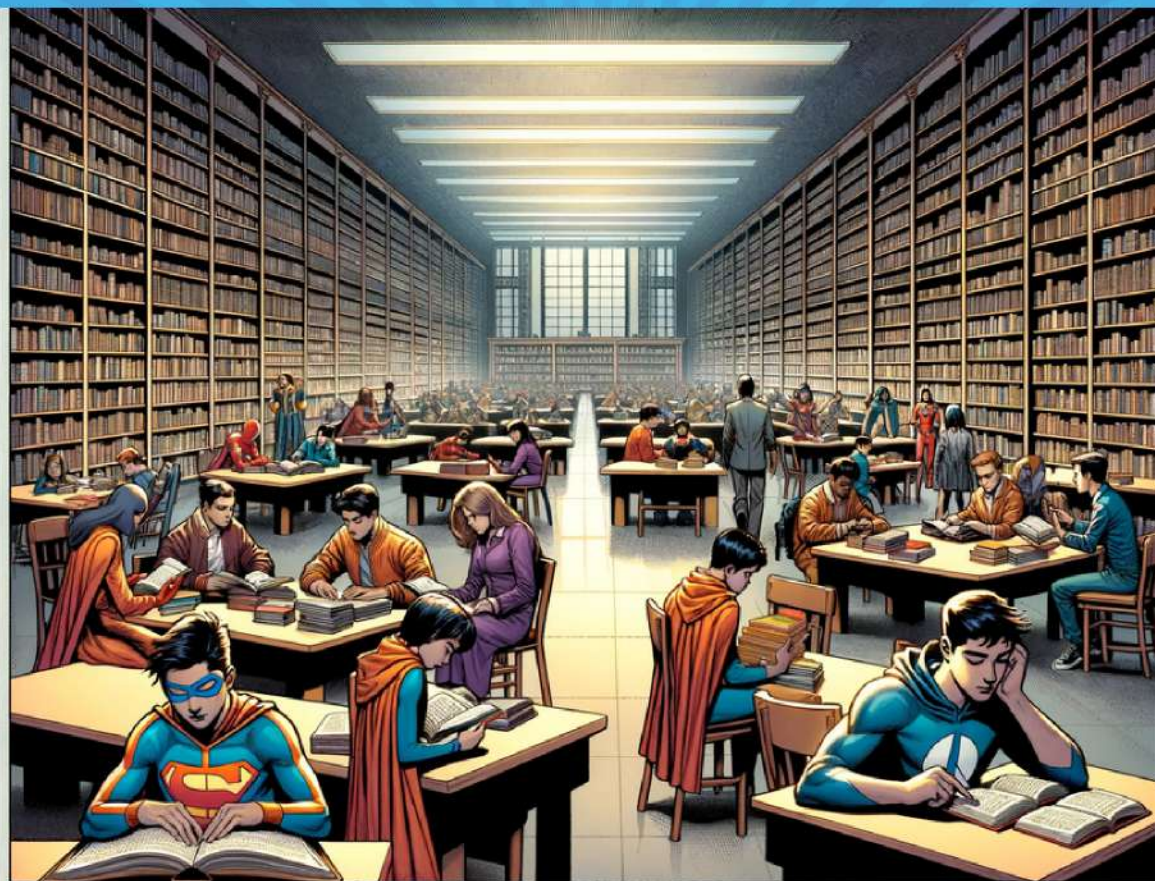

**original:** being the first or earliest, or something unique (adjective)

The museum displays the **original** documents of historical events.

# Let's Read

# Soaring High: The Sky Rulers of the Dinosaur Era!

Hey there, future paleontologists! Ever gazed up at the sky and wondered what flew around during the dinosaur era? It wasn't just land-**dwelling** giants; some incredible creatures ruled the skies! Let's swoop into the world of these amazing flying creatures and feathered dinosaurs.

# Soaring High: The Sky Rulers of the Dinosaur Era!

## Meet the 'Winged Finger'

First is Pterodactylus (ter-uh-DAK-tuh-luhs), often called "Pterodactyl." These creatures weren't dinosaurs but lived at the same time. They mainly ate fish, catching them with their sharp teeth as they skimmed over water. With wings made of skin and muscle, Pterodactylus was an expert at swooping down to snag a meal.

### Fun Fact:

Pterodactylus had a beak packed full of sharp teeth.

# The Amazing World of Plant-Eating Dinosaurs!

## Behold The Sky Giant

Next, gaze up at Quetzalcoatlus (ket-sal-KOH-at-luhs), one of the largest flying animals ever. Named after an Aztec god, this giant likely feasted on small animals and carrion (dead animals). Imagine a creature the size of a small plane soaring above you!

## Fun Fact:

Quetzalcoatlus was so huge, it stood as tall as a giraffe!

# The Amazing World of Plant-Eating Dinosaurs!

## Our First Feathered Friend

Archaeopteryx (ar-kee-OP-ter-iks) is super cool because it's like the first bird ever! It had feathers and wings, but also sharp teeth and a long tail, a perfect **blend** of bird and dinosaur. Some people call it the "first bird" or "Urvogel," which means "**original** bird" in German.

### Fun Fact:

Archaeopteryx's fossils show feathers like modern birds, but it couldn't sing.

# The Amazing World of Plant-Eating Dinosaurs!

## The Nighttime Insect Hunter

Meet Anurognathus (ah-NOOR-oh-NATH-us), a small but awesome flying creature! Anurognathus was a nocturnal hunter, zipping around at night and munching on insects. Imagine it darting through the air, gobbling up bugs like a little winged ninja!

## Fun Fact:

Anurognathus was the ancient world's version of a bat, using the cover of night to snack on insects.

# The Amazing World of Plant-Eating Dinosaurs!

These ancient flyers were amazing prehistoric creatures. They were not only masters of the sky but also adapted to various diets. Keep your curiosity soaring, and who knows what other fascinating facts you'll discover about these rulers of the prehistoric skies! 🦖🌌🦅

# Grammar

# Verb Tense Review

Match the time words to the correct verb tenses.

every day, sometimes, often, never

past tense

at the moment, currently, this month

present tense

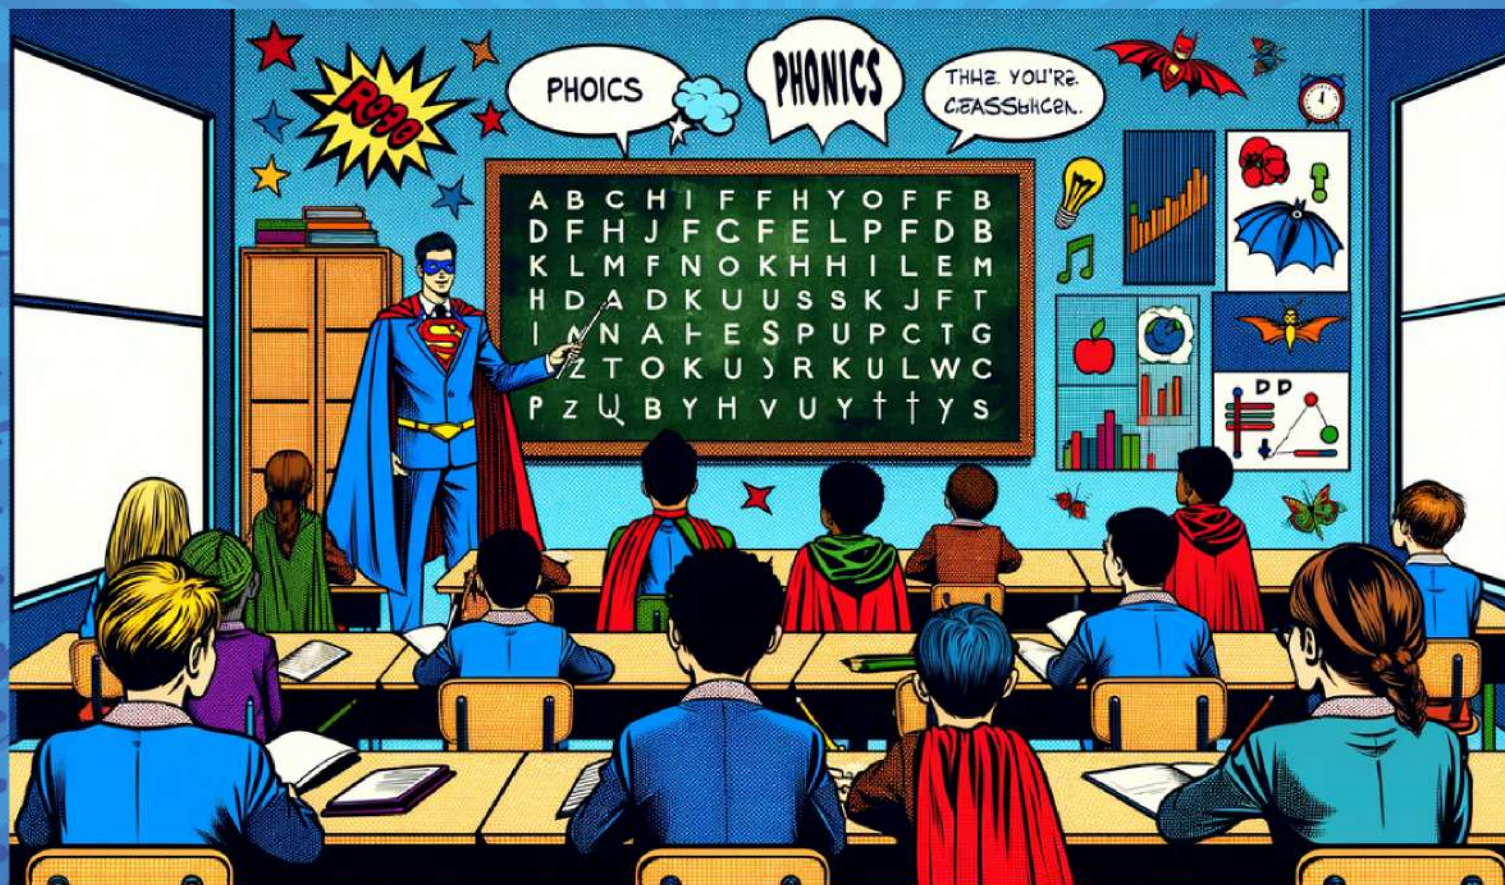

yesterday, 2 days ago, last month

future tense

tomorrow, in 3 days, next week, 2 days  
from now

present  
continuous

# Phonics

# suffixes

The suffixes 'cious' and 'tious' make the 'shus' sound.

## cious

judicious  
gracious  
pernicious  
mendacious  
sagacious  
luscious

## tious

propitious  
conscientious  
adventitious  
seditious  
superstitious  
nutritious
